thermochimica acta

Subject index

A.c. calorimetry
Phase transitions of quartz studied by a.c. calorimetry 301
Adiabatic calorimetry
Adiabatic calorimetric study on shape memory alloys: heat capacities and martensitic phase transformation of $Ni_{47}Ti_{44}Nb_9$ and $Nb_{80}Ti_{14}Ni_6$ alloys 231
Heat capacity and thermodynamic properties of millerite from 298.15 to 660 K and NiAs-type nickel(II) sulfide from 260 to 1000 K. Thermodynamics of the NiAs-type to millerite transition 213
Ageing
Modulated differential scanning calorimetry in the glass transition region 97
Alloy
Recent improvements in conduction calorimetry. Application to the martensitic transformations in shape memory alloys 239
Aluminium
Influence of fluorides on polymorphous transformation of α-Al_2O_3 formation 293
Apomyoglobin
Salt-induced formation of the molten globule state of apomyoglobin studied by isothermal titration calorimetry 385
Arrhenius
Relaxation of defects introduced into $YBa_2Cu_3O_{7-x}$ by mechanical milling 113

Beryllium
A differential scanning calorimetric study of precipitation in Cu–2Be 257
Binary system
Thermodynamic study of the condensed phases of $NaNO_3$, KNO_3 and $CsNO_3$ and their transitions 147

Calorimetry
Calorimetric and DTA studies of 1,3-dioxolane hydrate and $(1,3\text{-dioxolane})_{1-x}$ $(\text{tetrahydrofuran})_x$ mixed hydrates 65
Obtaining further information from calorimetry 31
Recent improvements in conduction calorimetry. Application to the martensitic transformations in shape memory alloys 239
Salt-induced formation of the molten globule state of apomyoglobin studied by isothermal titration calorimetry 385
Composite
Melting and resolidification of $YBa_2Cu_3O_{7-x}$/silver composites 277
Copper
A differential scanning calorimetric study of precipitation in Cu–2Be 257
Crystal
The behavior of water molecules associated with structural changes in phosphatidylethanolamine assembly as studied by DSC 373
The order–disorder transitions in some organic crystals 129
Crystal–crystal transitions
High-pressure DTA study on liquid crystalline polyesters with biphenyl as mesogen 189
Crystal–smectic transition
High-pressure DTA study on liquid crystalline polyesters with biphenyl as mesogen 189
Crystallization
The use of the JMAYK kinetic equation for the analysis of solid-state reactions: critical considerations and recent interpretations 315

Denaturation
Calorimetric study of the thermal unfolding of Kunitz-type soybean trypsin inhibitor at pH 7.0 365
Thermal denaturation of photosynthetic membrane proteins from *Rhodobacter sphaeroides* 355
Dioxolane clathrate hydrates
Calorimetric and DTA studies of 1,3-dioxolane hydrate and $(1,3\text{-dioxolane})_{1-x}$ $(\text{tetrahydrofuran})_x$ mixed hydrates 65

DSC
A differential scanning calorimetric study of precipitation in Cu–2Be 257
Calorimetric study of the thermal unfolding of Kunitz-type soybean trypsin inhibitor at pH 7.0 365
Heat capacities of urea, N-methylurea, N-ethylurea, N-(*n*)propylurea, and N-(*n*)butylurea in the range 200 to 360 K 203
Relaxation of defects introduced into $YBa_2Cu_3O_{7-x}$ by mechanical milling 113
The behavior of water molecules associated with structural changes in phosphatidylethanolamine assembly as studied by DSC 373
The liquid crystalline state of water–sodium cellulose sulphate systems studied by DSC and WAXS 343
DTA
Calorimetric and DTA studies of 1,3-dioxolane hydrate and (1,3-dioxolane)$_{1-x}$ (tetrahydrofuran)$_x$ mixed hydrates 65
Dynamic mechanical analysis
Modulated differential scanning calorimetry in the glass transition region 97
Dynamic mechanical relaxation
Relationship between enthalpy relaxation and dynamic mechanical relaxation of engineering plastics 119

Enthalpy
Hydration enthalpies of synthetic Na-A, cation-exchanged-A and some natural zeolites for evaluating as heat exchange absorbents 331
Enthalpy relaxation
Relationship between enthalpy relaxation and dynamic mechanical relaxation of engineering plastics 119
Entropy
Thermodynamics of the thallium alkanoates. IX. Thermodynamics of thallium(I)*n*-octanoate from temperatures of 6 to 490 K 163
Ergocity
Relaxational transitions and ergodicity breaking within the fluid state: the sugars fructose and galactose 9

Fast ion conduction
A glass transition due to freezing-in of positional disorder of mobile silver ions in the glassy state of the $AgBr–AgPO_3$ system 79
Ferromagnet
Simultaneous observation of heat capacity and magnetic susceptibility of a genuine organic ferromagnet under high pressures 175
Fluoride
Influence of fluorides on polymorphous transformation of α-Al_2O_3 formation 293
Fructose
Relaxational transitions and ergodicity breaking within the fluid state: the sugars fructose and galactose 9
Fusion
Thermodynamic study of the condensed phases of $NaNO_3$, KNO_3 and $CsNO_3$ and their transitions 147

Galactose
Relaxational transitions and ergodicity breaking within the fluid state: the sugars fructose and galactose 9
Glass
The order–disorder transitions in some organic crystals 129
Glass transition
A glass transition due to freezing-in of positional disorder of mobile silver ions in the glassy state of the $AgBr–AgPO_3$ system 79
Glassy crystals: correlation between molecular symmetry and glass transition 1
Modulated differential scanning calorimetry in the glass transition region 97
Glassy crystal
Extrinsic and intrinsic size effects on the phase transformation and metastability of a glassy crystal 49
Glassy crystals: correlation between molecular symmetry and glass transition 1

Halogen
The order–disorder transitions in some organic crystals 129
Heat capacity
A glass transition due to freezing-in of positional disorder of mobile silver ions in the glassy state of the $AgBr–AgPO_3$ system 79
Adiabatic calorimetric study on shape memory alloys: heat capacities and martensitic phase transformation of $Ni_{47}Ti_{44}Nb_9$ and $Nb_{80}Ti_{14}Ni_6$ alloys 231
Calorimetric and DTA studies of 1,3-dioxolane hydrate and (1,3-dioxolane)$_{1-x}$ (tetrahydrofuran)$_x$ mixed hydrates 65
Heat capacities of urea, N-methylurea, N-ethylurea, N-(*n*)propylurea, and N-(*n*)butylurea in the range 200 to 360 K 203
Heat capacity and thermodynamic properties of millerite from 298.15 to 660 K and NiAs-type nickel(II) sulfide from 260 to 1000 K.

Thermodynamics of the NiAs-type to millerite transition 213
Phase transitions of quartz studied by a.c. calorimetry 301
Simultaneous observation of heat capacity and magnetic susceptibility of a genuine organic ferromagnet under high pressures 175
Thermodynamic study of the condensed phases of $NaNO_3$, KNO_3 and $CsNO_3$ and their transitions 147
Thermodynamics of the thallium alkanoates. IX. Thermodynamics of thallium(I)*n*-octanoate from temperatures of 6 to 490 K 163

Heat exchange
Hydration enthalpies of synthetic Na-A, cation-exchanged-A and some natural zeolites for evaluating as heat exchange absorbents 331

Heat of solution
Obtaining further information from calorimetry 31

High-pressure DTA
High-pressure DTA study on liquid crystalline polyesters with biphenyl as mesogen 189

Hydration
Hydration enthalpies of synthetic Na-A, cation-exchanged-A and some natural zeolites for evaluating as heat exchange absorbents 331

Hydrophobic interaction
Salt-induced formation of the molten globule state of apomyoglobin studied by isothermal titration calorimetry 385

Hysteresis
Modulated differential scanning calorimetry in the glass transition region 97

Incommensurate phase transition
Phase transitions of quartz studied by a.c. calorimetry 301

Internal energy
Obtaining further information from calorimetry 31

Kinetics
Phenomenology of phase transitions in describing the solid-phase reaction kinetics 309
The use of the JMAYK kinetic equation for the analysis of solid-state reactions: critical considerations and recent interpretations 315

Liquid crystal
The liquid crystalline state of water–sodium cellulose sulphate systems studied by DSC and WAXS 343

Magnetism
Simultaneous observation of heat capacity and magnetic susceptibility of a genuine organic ferromagnet under high pressures 175

Martensitic phase transformation
Adiabatic calorimetric study on shape memory alloys: heat capacities and martensitic phase transformation of $Ni_{47}Ti_{44}Nb_9$ and $Nb_{80}Ti_{14}Ni_6$ alloys 231

Martensitic transformation
Recent improvements in conduction calorimetry. Application to the martensitic transformations in shape memory alloys 239

MDSC
Modulated differential scanning calorimetry in the glass transition region 97

Mechanism
Influence of fluorides on polymorphous transformation of α-Al_2O_3 formation 293

Melting
Melting and resolidification of $YBa_2Cu_3O_{7-x}$/silver composites 277
Thermodynamics of the thallium alkanoates. IX. Thermodynamics of thallium(I)*n*-octanoate from temperatures of 6 to 490 K 163

Metastable
Extrinsic and intrinsic size effects on the phase transformation and metastability of a glassy crystal 49

Milling
Relaxation of defects introduced into $YBa_2Cu_3O_{7-\delta}$ by mechanical milling 113

Modulated calorimetry
Modulated differential scanning calorimetry in the glass transition region 97

Molten globule
Salt-induced formation of the molten globule state of apomyoglobin studied by isothermal titration calorimetry 385

N-(mono)alkylureas
Heat capacities of urea, N-methylurea, N-ethylurea, N-(*n*)propylurea, and N-(*n*)butylurea in the range 200 to 360 K 203

NiAs-type
Heat capacity and thermodynamic properties of millerite from 298.15 to 660 K and NiAs-type nickel(II) sulfide from 260 to 1000 K. Thermodynamics of the NiAs-type to millerite transition 213

NiS
Heat capacity and thermodynamic properties of millerite from 298.15 to 660 K and NiAs-type nickel(II) sulfide from 260 to 1000 K.

Thermodynamics of the NiAs-type to millerite transition 213
Nitrate
Thermodynamic study of the condensed phases of $NaNO_3$, KNO_3 and $CsNO_3$ and their transitions 147
Non-equilibrity
Phenomenology of phase transitions in describing the solid-phase reaction kinetics 309

Oxide
Final account of the thermochemical properties of complex oxides in the Y–Ba–Cu–O system 285
Oxygen
Melting and resolidification of $YBa_2Cu_3O_{7-x}$ – x/silver composites 277

Phase diagram
High-pressure DTA study on liquid crystalline polyesters with biphenyl as mesogen 189
Phase transformation
Extrinsic and intrinsic size effects on the phase transformation and metastability of a glassy crystal 49
Phase transitions
Heat capacities of urea, N-methylurea, N-ethylurea, N-(*n*)propylurea, and N-(*n*)butylurea in the range 200 to 360 K 203
Phenomenology of phase transitions in describing the solid-phase reaction kinetics 309
The order–disorder transitions in some organic crystals 129
Phenomenological description
Phenomenology of phase transitions in describing the solid-phase reaction kinetics 309
Photosynthesis
Thermal denaturation of photosynthetic membrane proteins from *Rhodobacter sphaeroides* 355
Physical ag Poly(aryl-ether-ether-ketone)
Relationship between enthalpy relaxation and dynamic mechanical relaxation of engineering plastics 119
Plastic crystal
Glassy crystals: correlation between molecular symmetry and glass transition 1
Poly(ether imide)
Relationship between enthalpy relaxation and dynamic mechanical relaxation of engineering plastics 119
Polymorphism
Influence of fluorides on polymorphous transformation of α-Al_2O_3 formation 293
Obtaining further information from calorimetry 31
Polystyrene
Modulated differential scanning calorimetry in the glass transition region 97
Precipitation
A differential scanning calorimetric study of precipitation in Cu–2Be 257
Protein
Thermal denaturation of photosynthetic membrane proteins from *Rhodobacter sphaeroides* 355
Protein folding
Salt-induced formation of the molten globule state of apomyoglobin studied by isothermal titration calorimetry 385

Quartz
Phase transitions of quartz studied by a.c. calorimetry 301
Quasi-isothermal measurement
Modulated differential scanning calorimetry in the glass transition region 97

Rhodobacter sphaeroides
Thermal denaturation of photosynthetic membrane proteins from *Rhodobacter sphaeroides* 355
Recrystallization
The use of the JMAYK kinetic equation for the analysis of solid-state reactions: critical considerations and recent interpretations 315
Relaxation
Obtaining further information from calorimetry 31
Relaxation of defects introduced into $YBa_2Cu_3O_{7-x}$ by mechanical milling 113
Relaxational transitions and ergodicity breaking within the fluid state: the sugars fructose and galactose 9
Resolidification
Melting and resolidification of $YBa_2Cu_3O_{7-x}$/silver composites 277

Shape memory alloy
Adiabatic calorimetric study on shape memory alloys: heat capacities and martensitic phase transformation of $Ni_{47}Ti_{44}Nb_9$ and $Nb_{80}Ti_{14}Ni_6$ alloys 231
Silver
Melting and resolidification of $YBa_2Cu_3O_{7-x}$/silver composites 277

Silver ion
A glass transition due to freezing-in of positional disorder of mobile silver ions in the glassy state of the $AgBr-AgPO_3$ system 79
Size effect
Extrinsic and intrinsic size effects on the phase transformation and metastability of a glassy crystal 49
Sodium cellulose sulphate
The liquid crystalline state of water–sodium cellulose sulphate systems studied by DSC and WAXS 343
Solid-phase reactions
Phenomenology of phase transitions in describing the solid-phase reaction kinetics 309
Superconductor
Final account of the thermochemical properties of complex oxides in the Y–Ba–Cu–O system 285
Symmetry
Glassy crystals: correlation between molecular symmetry and glass transition 1

Thallium alkanoates
Thermodynamics of the thallium alkanoates. IX. Thermodynamics of thallium(I)*n*-octanoate from temperatures of 6 to 490 K 163
Thermal unfolding
Calorimetric study of the thermal unfolding of Kunitz-type soybean trypsin inhibitor at pH 7.0 365
Thermodynamic data
Final account of the thermochemical properties of complex oxides in the Y–Ba–Cu–O system 285
Thermophysics
Thermodynamics of the thallium alkanoates. IX. Thermodynamics of thallium(I)*n*-octanoate from temperatures of 6 to 490 K 163
Thermotropic polyesters
High-pressure DTA study on liquid crystalline polyesters with biphenyl as mesogen 189
Transition
Calorimetric and DTA studies of 1,3-dioxolane hydrate and $(1,3\text{-dioxolane})_{1-x}$ $(\text{tetrahydrofuran})_x$ mixed hydrates 65
Relaxational transitions and ergodicity breaking within the fluid state: the sugars fructose and galactose 9
Thermodynamic study of the condensed phases of $NaNO_3$, KNO_3 and $CsNO_3$ and their transitions 147
Thermodynamics of the thallium alkanoates. IX. Thermodynamics of thallium(I)*n*-octanoate from temperatures of 6 to 490 K 163
Trypsin inhibitor
Calorimetric study of the thermal unfolding of Kunitz-type soybean trypsin inhibitor at pH 7.0 365
Urea
Heat capacities of urea, N-methylurea, N-ethylurea, N-(*n*)propylurea, and N-(*n*)butylurea in the range 200 to 360 K 203

Water
The behavior of water molecules associated with structural changes in phosphatidylethanolamine assembly as studied by DSC 373
The liquid crystalline state of water–sodium cellulose sulphate systems studied by DSC and WAXS 343
WAXS
The liquid crystalline state of water–sodium cellulose sulphate systems studied by DSC and WAXS 343

Zeolite.
Hydration enthalpies of synthetic Na-A, cation-exchanged-A and some natural zeolites for evaluating as heat exchange absorbents 331
